**CHEMICAL DISPERSIONS**  
**-ADDITIONAL DISPERSIONS-**

**VULSOB GR**

**-CALCIUM OXIDE-**

**PRODUCT DESCRIPTION:**

Vulsob GR is 90% active calcium oxide with moisture-proof treating agent. This grade is specifically developed for compounding and recycling applications.

**TYPICAL PROPERTIES:**

Appearance .....	Powder
Color .....	Gray
Percent Activity .....	90%
Specific Gravity .....	3.20-3.40

**GENERAL RECOMMENDATIONS:**

Vulsob GR is used at levels of 5.0 to 10.0 parts per 100 rubber. Vulsob GR is used as a desiccant due to its powerful hygroscopic nature. It is used effectively to absorb moisture in fillers and other additives during compounding. As a moisture scavenger, Vulsob GR provides protection against blistering and porosity. Add this product towards the end of a single pass mix or during the second pass.

One variable important in determining the use level of Vulsob GR is the time of the year. Those months which bring high humidity to a plant may require larger amounts of Vulsob GR to provide the protection needed to produce an acceptable product. The filler loading and type of filler, as well as the mixing procedure, are also important factors.

**STORAGE RECOMMENDATIONS:**

Vulsob GR should be stored in closed containers in a cool, dry and well-ventilated area. Avoid direct exposure to sunlight and with water and acids.
