# STEARATES

## ZINC STEARATE - Powder

### PRODUCT DESCRIPTION:

Zinc Stearate is a clear-melting, high quality zinc carboxylate of stearic (C-18) and palmitic (C-16) acids that is ground to a very fine, highly dispersible white powder.

### TYPICAL PROPERTIES:

Appearance .....	white powder
Ash (as ZnO).....	13.0 – 14.5%
Free Fatty Acid .....	1.00% (max.)
Passing 325 mesh sieve .....	95% (min.)
Moisture .....	0.50% (max.)
Specific Gravity .....	1.1
Packaging.....	50 pound bags

### APPLICATIONS:

Zinc Stearate powder is an effective internal lubricant, mold release agent used in plastic processing and rubber applications. It is the metallic stearate of choice in most polyolefin processing applications due to its functionality and low moisture content. Zinc Stearate is an extremely heat stable product that is manufactured at low temperatures with minimal heat history. Zinc Stearate complies with FDA Standard CFR 21 sections 177.2600 and 178.2010.

T-Zinc Stearate powder (66442) TLM (6-25-2019)

Included with its product literature and upon the request of its customers, Akrochem provides product specifications and evaluations, suggested formulations and recommendations and other technical assistance, both orally and in writing (collectively the "Technical Information").
